Key projects completed and work experience

- **MILESTONE PROJECT 1** Html5/CSS3/Java Script/Bootstrap
<https://tomciosegal.github.io/craft-beerfestival/>
A one-page scrolldown website built to promote a beer festival. Website features a promotional background video (sound on request for better sensation), in navbar: about, craft beer 2019, Photo, Where? Contact, WIN BUTTON. Clicking on these options, it takes directly to the info, to make the website very easy to navigate. Navbar is fixed, so it's possible to go to any place of website at any time by simply clicking of a button.
- **MILESTONE PROJECT 2: Interactive Frontend Development - Java Script**
https://tomciosegal.github.io/NBA_greatest_trio/
Web site features seven charts plus three players portfolio on top of the page, where everyone can get familiar with the NBA heroes that developer wanted to present. The See stats button enables to go down to actual charts, where all the fun begins.
- **MILESTONE PROJECT 3** Python/MongoDB/Flask
<https://fitness-pot.herokuapp.com/>
The purpose of Fitness Pot is to host healthy recipes for people who want to who like to eat delicious and nutrition food. The primary target audience are people doing gym and lead a healthy lifestyle, but after all it seems like there is a vast community looking for this sort of recipes.
- **MILESTONE PROJECT 4 FULL FRAME Django E-Commerce**
<https://nutrystore-cygal.herokuapp.com/>
The Nutrystore was built and deployed as final project for the Code Institute Full Stack Web Development Diploma. The purpose of The Nutrystore online shop is to promote organic food supplements. This website is designed to create an impression of cleanness/richness of the product accompanied with smooth and effortless online shopping experience.
- **FULL PORTFOLIO**
